

# WE'RE HIRING

## STRUCTURAL ENGINEERING INTERN

Get paid on-the-job experience working on a variety of structural design projects as well as spending time in the field as an intern at Sargent Engineers, Inc. Typical duties would include the following:

- Assisting with the structural design and plan preparation for bridges, buildings, retaining walls, steel reservoirs, and other miscellaneous structures.
- Field experience with our Engineers in performing condition inspection of in-service bridges and structures across the Pacific Northwest.
- Preparing bridge load ratings to evaluate deterioration and establish truck load limits.
- Flexible hours to coordinate with your class schedule.

*This is a temporary position reserved for engineering students currently enrolled in their junior and/or senior year. However, there is potential for interns to obtain a permanent position as a full time employee upon completion of their Bachelor degree, dependent on their performance as an intern.*

Pay rate: \$20-\$27 per hour, dependent on qualifications and previous experience.

### Required Qualifications:

Candidates must be working towards a BS or MS in Civil Engineering with coursework in structural engineering at an accredited school. The applicant should be physically able to spend time outdoors completing field work around traffic, at heights, and in sometimes remote and rugged terrain. Knowledge of Microsoft Office, AutoCAD, Civil 3D, and structural modeling programs is desirable. Candidates must also be currently authorized to work in the United States and fluent in English.

Sargent Engineers is an Equal Employment Opportunity Employer who encourages all qualified individuals to apply, regardless of their race, age, ethnicity, religion, sex, veteran status, or any other status protected by law.
